

✓ Problem–Solution Fit – HealthAI

The Problem–Solution Fit validates how well HealthAI addresses the real-world challenges users face when seeking medical guidance online.

🔍 Identified Problem:

- Users face confusion, anxiety, and delays when searching online for health information.
 - Most platforms are generic, impersonal, or unreliable.
 - There is no unified tool that provides context-aware, personalized, and trustworthy health support instantly.
-

💡 HealthAI as the Solution:

User Need	HealthAI's Response
I want to know if my symptoms are serious	Disease Predictor provides likely conditions with severity and advice
I want clear answers, not generic content	Patient Chat uses AI to generate empathetic, tailored responses
I need a plan to manage my condition	Treatment Plan Generator offers step-by-step medical advice
I want to track and understand my health	Health Analytics visualizes trends and AI insights from metrics
I need this anytime, without visiting a clinic	HealthAI is available online, anytime, with no registration needed
